

Enhance your company website with a powerful marketing tool that allows you to promote your most valuable asset - **YOUR AGENTS**.

From your **Agent Roster** page, visitors can click to an **Agent Profile** or to that Agent's individual listings.

Prospective clients will be able to review a professional profile of each agent, including their experience, specialty areas, professional designations, as well as their active lease and sale listings.

My Xclusives provides all this from your company web site. Agent profiles as well as property information are updated automatically on your site anytime you make changes to it in CDX®.
